GRADUATE PROGRAMS

Master of Business Administration

MBA is a program specifically designed to equip you with the knowledge and skills required to become an effective leader in diverse business contexts. The program acknowledges that contemporary markets are increasingly complex and dynamic in terms of culture and demand, that information and communication are crucial for success, and that social responsibility for sustainability and corporate entrepreneurship are crucial. Here, you will develop the skills required to become a business leader, but also skills for other organizational roles, for example, when leading projects. Through group and project-oriented work you will develop your planning and collaboration skills. Courses focus on leadership, corporate social responsibility, family business management and corporate entrepreneurship. The staff involved in this program have substantial experience in management research. This ensures that all research you encounter throughout your studies is innovative and up to date.

There are a wide range of careers you may pursue after graduation, such as: project leader, change manager, business developer, or head of operations. The program also prepares students for doctoral research education.

Project Planning and Management

The MSc. in project planning and management builds knowledge and skills in the planning and management of projects and programs. It is designed to deepen critical understanding of the strategies, processes, techniques and issues involved in taking ideas for development and turning them into practical realities with identifiable outcomes and benefits. You will have the chance to gain more confidence to better plan complex projects, lead and inspire your team, manage difficult stakeholders and cope with the most unpleasant or unexpected risks. You will also have the opportunity to develop practical skills relating to design, planning and execution of projects, procurement and contract management in addition to conflict resolution and effective multi-functional project integration. The program has an experienced team of staff, which is made up of academically and professionally qualified lecturers with relevant industrial experience and experts with wide research interests.

The degree provides an excellent basis for career enhancement or conversion for those with interest and experience in projects for development and for commercial benefit. Potential career destination includes public authorities, international organizations, and higher education institutions, consulting companies, private enterprises and freelance consultant.
